DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1, 6-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. The language as recited in claim 1, renders the claim indefinite because it is unclear structures are being claimed. Claim 1 recited for a guide passage in line 6, and again for a guide passage in line 22, rendering the claim indefinite for double inclusion. The claim also repeats "on a line that is substantially an extension of said cut-out", see lines 9, 15, and 21.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

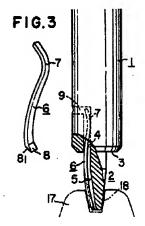

A person shall be entitled to a patent unless -

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1, 6-10 and 12 (as best understood) are rejected under 35
- U.S.C. 102(b) as being anticipated by Matsushima (4,060,114).

Matsushima discloses all of the limitations of claim 1 (as best

Application/Control Number: 10/512,000

Art Unit: 3723

understood), i.e., a screw holding screwdriver having a plurality of perpendicular end edge tips (Phillips type) having a cut out and an elastic piece inserted in a guide passage for holding screws.

Wherein the screwdriver includes a sleeve (28) and the groove has a dimension longer than a thickness of the blade; the elastic portion being bent; the groove is offset circumferentially and an end of the elastic portion being anchored in the groove; the tip of the elastic portion being offset radially (e.g., Figs. 4, 5 and 10).

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 11 (as best understood) is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsushima in view of Desbarats (3,517,714).

Matsushima as applied to claim 5 above meets all of the limitations of claim 11, except for a movable sleeve (it is unclear what is meant by elastically movable, e.g., type of material forming the sleeve?).

Desbarats teaches screwdrivers with a movable sleeve (19), which surrounds the workpiece. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Matsushima with the movable sleeve as taught by Desbarats to secure the workpiece.

Conclusion

9. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

10. Applicant's arguments filed July 11, 2006 have been fully considered but they are not persuasive. The argument that prior art does not disclose a screwdriver for a screw that has a form of a cross, three way or a polygonal shape is in error, since as clearly disclosed by Matsushima, the screwdriver is a Phillips type used for the cross-shaped or polygonal shaped screw. The arguments that prior art does not disclose a cut out, long groove, protective sleeve or a guide passage is not persuasive, since as clearly disclosed by Matsushima, the screwdriver has an elastic piece disposed in a guide passage or groove formed from a cut out of one of the blades and a sleeve (described in column 4, lines 57-68) positioned around the elastic piece and the cut-out, in which the tips would be exposed to engage the workpiece (inherent), meeting the claims as best understood.
